

TECHNOLOGY PRODUCTS: JAGUAR TRANSPORTATION DEVELOPMENT PLATFORM

Transite's Jaguar Transportation Development Platform (TDP) is an industry-unique transportation management platform for carriers, 3PLs and shippers. JaguarTDP delivers the core functionality of rating and pricing management—including rating (small package, LTL, TL, air, multimodal), database management and user security—while offering the customer the flexibility to build their own transportation management applications within the platform, or outside the platform.

Easily Add Applications Specific to Your Business Strategy

- **A TMS Development Platform**
- **Create Your Own Transportation Applications**
- **For 3PLs, Carriers and Shippers**
- **Industry Unique**

Jaguar TDP A STRATEGIC INVESTMENT THAT EVOLVES WITH YOUR BUSINESS

- Delivers fundamental transportation management functions that are not practical or cost-effective to develop by internal resources.
- Perfect for 3PLs, Shippers and Carriers who envision transportation management as a strategic opportunity versus simply processing transactions.
- Platform evolves as needs change—initially can be used as standalone system, and then integrated in a deliberate manner component by component.
